Database: MongoDB

Tools: Github, Visual Studio Code, Figma, Chrome Dev Tool, Netlify

PROJECTS

1. Barrel Of Books: [Live Site](#) || [Client Repo](#) || [Server Repo](#)

-Those websites make for resale Books with the ability to advertise a book. The most interesting thing is buyers can buy books & pay with their credit card/ debit card or any other valid card & buyers can report a product to admin. Sellers can add products & advertise their products etc.

- Handle Three Different User Authentication.
- Add Stripe Payment Method.
- Buyer can report any product to Admin.
- Seller can add their products & also see her published product. If the seller wants the seller able to delete her product
- Admin have three layers in the dashboard all seller, all buyers & Reported Item. In reported Item admin see all reported items done by the buyer & Admin can delete those products.
- Handle Advertised Products.

Technologies: #ReactJs #ExpressJs #MongoDB #Firebase #Axios #React_Hook_From #TanStack_Query #Date_Picker

2. Healthy Mind: [Live Site](#) || [Client Repo](#) || [Server Repo](#)

-A Doctor Personal Services Website. the doctor provides her with all services including services review facilities.

- Handle User Reviews.
- Review Edit & Delete Functionality.
- Protected Routes.
- Handle User authentication.
- Add Services Functionality with Dashboard.

Technologies: #ReactJs #ExpressJs #MongoDB #Firebase #Tailwind #DaisyUI

3. Freelancing Educare Institute: [Live Site](#) || [Client Repo](#) || [Server Repo](#)

-A Single-page learning platform website. There are many courses provided by the institute & users can enroll in courses with their login account.

- Handle User Authentication.
- PDF download option.
- Dark & Light Mood Facility.
- Handle Server Side To Load Data.

Technologies: #ReactJs #ExpressJs #MongoDB #Firebase #Tailwind #DaisyUI
